"Judge Hydrick added: "Frankly, the damage being done to the property by those folks inhabiting it is far worse than anything anybody else is doing at this point, and they need to get out of there. But that's another issue for somebody else to worry about."

Monday, January 9, 2023

- Atlas 1 and Long Engineering received emails from citizens requesting they remove themselves from project
- FBI and GBI have the emails and the sender's information
- There is no crime that has been committed at this time with the emails

I'm writing concerning the destruction of the Atlanta Forest via Atlas Technical Consultants' subsidiary Long Engineering's relationship with Brasfield & Gorrie. As I'm sure you are aware, the City of Atlanta has leased 381-acres of Weelaunee Forest to the Atlanta Police Foundation for a police military facility. There is overwhelming evidence that increased police presence does very little to combat crime, rather having the effect of continually marginalizing struggling communities. I highly urge you to consider the catastrophic effect this project will

have on the city of Atlanta and Weelaunee Forest, a watershed surrounded by primarily Black residents who overwhelmingly oppose the project. As a person of executive influence at Atlas Technical Consultants/Long Engineering, I'm asking you to oppose the construction of the Atlanta Police Foundation military facility and advocate that Atlas/Long Engineering break all professional ties with Brasfield & Gorrie as long as Brasfield & Gorrie is involved in the construction of this development. Atlas should also cease in all activity at Michelle Obama Park and Intrenchment Creek Park.

Thank you very much for your time reading this and please consider this message.

Best,

HLS and our partners are closely watching this. We don't know if this could be like the "week of Action" they have. During the week of action, we do see an increase in the activity of the group to our stakeholders. This flyer has been sent out to our partners and to remain vigilant.

Please do not mention  Condlands group is working that angle.

January 25, 2023

This event was peaceful and held at the Entrenchment Park. The group had a celebration of life. No issues.

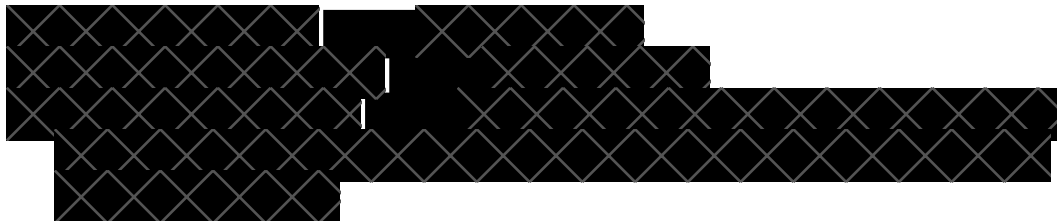

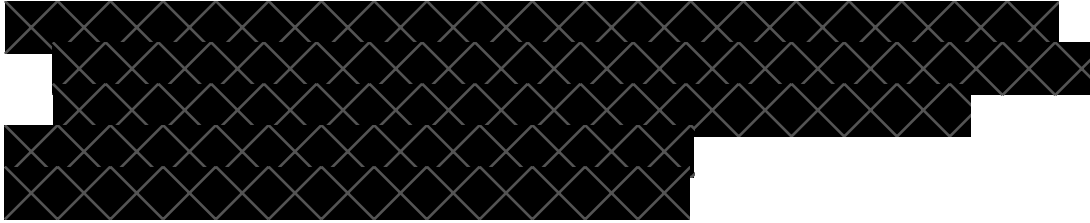

The group (150 to 200) assembled at the lower Alabama of the Underground. People gathered and shared words at 1700. Group began walking south then changed directions to go North. Group walked at a fast-paced dressing in black clothing as they marched. Group was focused on 191 Peachtree St the APF building and the Bank of America. Group used fireworks, rocks, hammers, and accelerants to promote damage in the area.

APF board members and stakeholders are experiencing an influx of emails and phone calls asking them to drop cop city.

Miami PD is reporting they have a good lead on the damage to the B&G building on January 6th. The detective was able to link the car to subjects they are familiar with. They have a warrant to place a tracker on the car. The detective is also saying these are local protestors that were arrested in the past and part of antifa. This information was given to FBI Agent King.

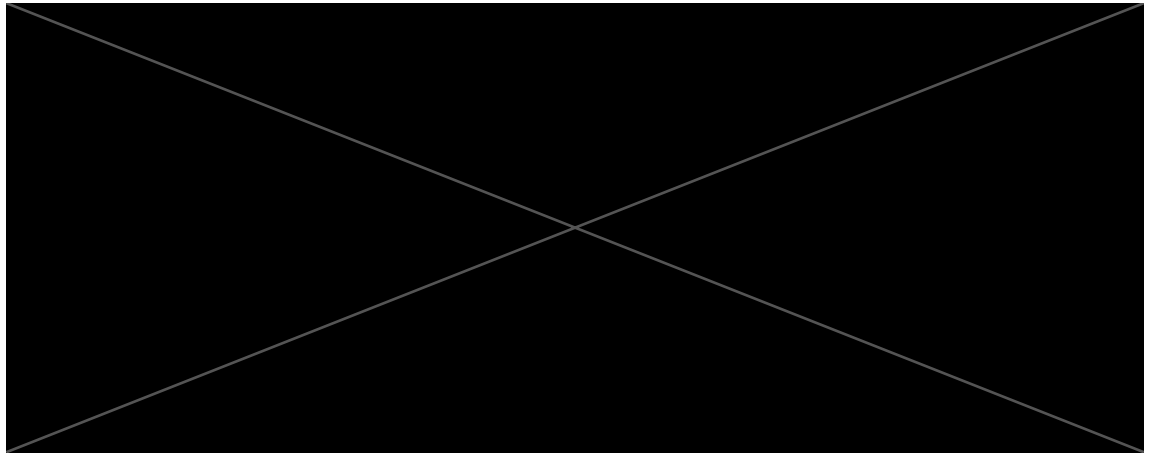

I spoke with Matt Smith with B&G about the items found in the forest. He stated the security vest was not theirs. In the future the helmet will be numbered, and the vest will be numbered and accountability will be taken moving forward.

Questions from group:

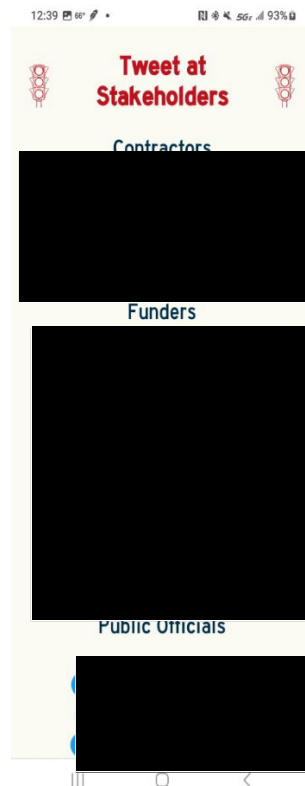

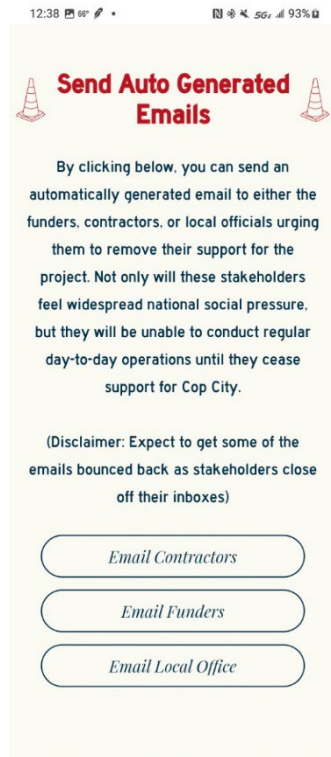

1. Want to know when we will shift down from a 24/7 stance at the park? Depends on the intelligence and the case we have against them.
2. Wanted to make sure we are in contact with Birmingham PD. Yes, them and Mountain Brook we are in contact with. I spoke with Sgt. Shiver with Birmingham and Det Nichols with Mtn Brook. Both are on our signal app for LEO>
3. Is the email correspondence that is on social media is anyone investigating that? There is a female in California that is sending out everyone's email and business that are involved on the project. The information is open source, and some is made up like wrong email address. Is this part of the FBI investigation? Sending emails is a form of protest, doxing is not against the law at this time. I also spoke with Matt after the call and further explained unless they are actively threatening its not against the law.
4. Approved of the Mayor, Chief and Thurmond speech on the press release

Thursday February 2, 2023

This will be their biggest concern tomorrow B&G has had 10,000 emails sent to them in a 24hr period. Atlas at last count had 700 sent in a just a few hours.

- Social media began posting a “toolkit” to email and tweet the contractors.
- Secret Service is now involved to determine the location of the Stopcopcity.net
- If it is the country, it will be easier to “possibly” terminate

- No issues other than heckling to the speakers
- Emory PD reported a Stop cop city protest during the speech by their President. No issues

Court date for the land disturbance to stop South River Watershed Alliance, Inc

Chief Schierbaum will be there

IN THE SUPERIOR COURT OF FULTON COUNTY
STATE OF GEORGIA

South River Watershed Alliance, Inc.,	*
Edward "Ted" Terry, and	*
Amy Taylor	*
Plaintiffs	*
v.	*
Atlanta Police Foundation, Inc.	*
Defendant	*

**Verified Complaint for Injunctive Relief
to Stop Unauthorized Clearing**

Nature of Action

1.

This suit seeks emergency injunctive relief to stop land disturbance that continues even though an administrative appeal filed by plaintiff Amy Taylor "stays the land disturbance or construction activity until the zoning board of appeals issues a decision on the appeal." (DeKalb County Code, Ch. 27, Section 7.5.2(D) and Appendix B, Part XVII, Section 1131(f)).

Requested Relief

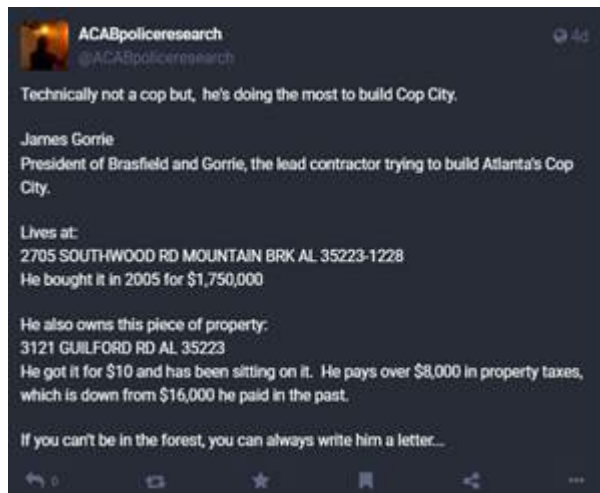

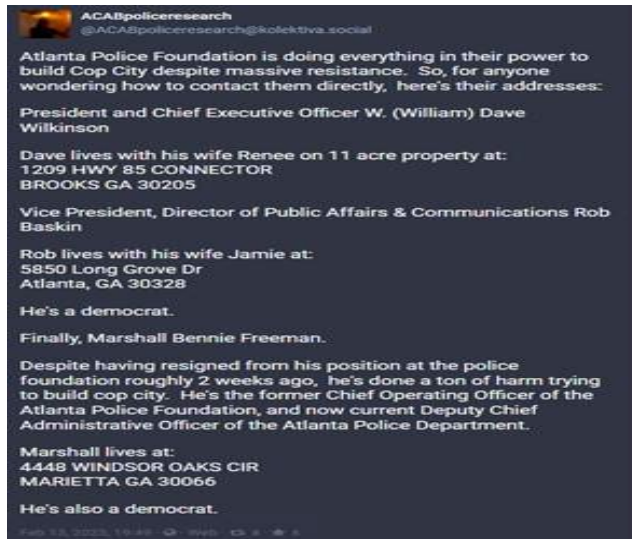

Plaintiffs respectfully request that this Court:

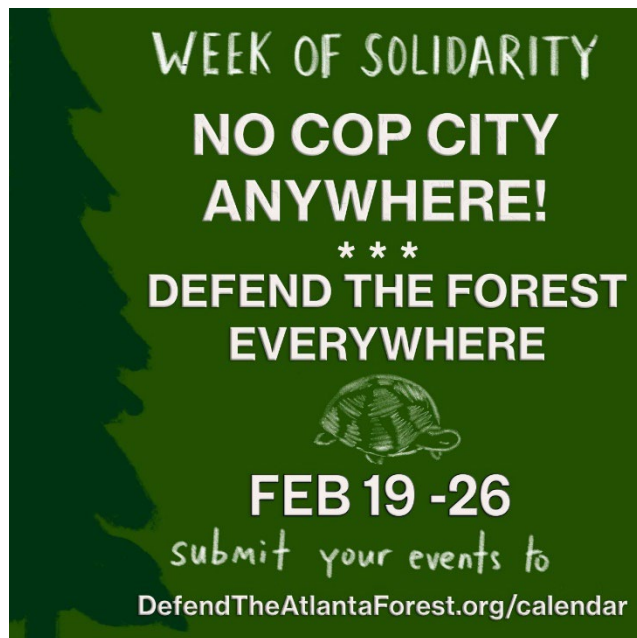

- a. Grant an immediate temporary restraining order to stop all land disturbance on DeKalb County Parcel 15-081-08-001 and DeKalb County Parcel 15-082-01-001.
- b. Grant a preliminary injunction to prevent all land disturbance on DeKalb County Parcel 15-081-08-001 and DeKalb County Parcel 15-082-01-001 pending the DeKalb County zoning board of appeals' decision on the appeal.
- c. Retain jurisdiction to enforce the requested relief and to grant equitable relief as the Court deems just and appropriate pending a final decision on the issues asserted in plaintiffs' appeal.

A Georgia State University student and movement organizer told *Truthout* he is working to more closely coordinate student groups across different universities. Students are focused on organizing a large convergence during a week of action March 4-11 to reoccupy the South River Forest, he says. "We don't want police to just chop down as many trees as they can before [a Zoning Board decision on the permit appeal]. So the legal front is really important for that strategy," said Elias, who requested a pseudonym to avoid police surveillance of his organizing activities.

The three pieces of equipment set on fire was a bulldozer, excavator, and a street sweeper. First two pieces belonged to a tree clearing company (used on our site). The sweeper belonged to CW Matthews. The equipment has been around Bouldercrest and 285. The DOT is doing road widening which requires to fall trees.

The fire was set in the engine compartment by using a sticky substance. The fire was extremely hot and therefore the engines were a complete loss. If you recall the sticky substance was also located on tires on our site. We located this substance on the tires they would continue to set on fire upon our approach into the property. DeKalb arson and DeKalb HLS is investigating.

No cameras or video located at this time.

No graffiti on scene

This equipment has been on this site for a while. It is thought that the logger that left our site on Tuesday went to this site to work. A possibility he could have been followed and they associated the logger with both sites.

The group did take responsibility by posting on scenes blog.

Information Gathered

- The meeting that took place on Wednesday between DeKalb DA, Atty Gen, FBI, GBI was an overview of the case to get DeKalb caught up.
 - There was really no discussion about the indictment, when asked when it would happen? The response was "don't know". Chief Schierbaum was told March 4th about 3 weeks ago. The indictment is too large and **has people involved that did not play a part in the case but were known simply by association.**
 - Alan Williams mentioned to me that ATLAS was trying to pull out. He said Marshall was working to put a meeting together with the COO's of all the cities where ATLAS is at. I'm not sure what the request would be besides asking for police protection.
 - FBI SAC Leader was asked to put together a list of ALL ATLAS location that have been vandalized. She will be having a meeting with ATLAS. Again, I'm not sure if this has something to do with the meeting that Marshall is putting together.
-

Mr. Gorrie commented on the signal app “why was no arrest made” APD did not know about it till hours later.

Quotes from participants:

Steve Norris, 79, former adjunct professor of nonviolence, Warren Wilson College, Asheville, NC, said “This is one of the most important struggles going on in the world right now – for environmental, racial and social justice. That’s why I’m here.”

Rose Abramoff, 35, Knoxville, TN, earth scientist said, “I am here to support the youth and elders who are putting their bodies in the way of 85 acres of mature forest slated for destruction. Indigenous land, Black lives, Earth’s future are all at stake. We must save this forest and Stop Cop City.”

Andy Hinz, 62, of Baltimore, MD, said, “We can either rise up against fascism now and lift ourselves up by fighting for life, liberty and the pursuit of happiness for EVERY living being on this planet or Cop City will kill each and everyone of us if we don’t stop it because those sick with greed and privilege will never be satisfied.”

Deborah Kushner, 68, Staunton, VA, said, “The struggle in Atlanta is emblematic of the worst ills that plague our society: classism, racism, environmental justice, a disregard for nature, corporate rule and militarism. And now, murder of the innocent. This utter disregard for humanity and the natural world is repulsive.”

Melinda Tuhus, 75, New Haven, CT, said, “The fight against Cop City is the epitome of intersectionality: it brings together the fight for Black lives and against the militarization of the police; the fight for clean air and water, especially for communities suffering from the lack of both; and for the protection of a forest that has a right to exist for its own sake, and which helps absorb carbon dioxide and protect the planet.”

-apd cruisers on memorial drive: 3 cruisers smashed

both actions had equipment issues. check your materials.

we took action after non combative demonstrations at cadence bank and home depot. the police attacked those demonstrations with no cause, as they do wherever or however the movement gathers. there can be no separation of time and space for tactics when the police have turned society into a warzone. despite this, we dispersed our activity as much as possible across their area of control.

to address the referendum. we encourage thsoe who are pursuing a strategy of referendum to continue supporting all methods to stop cop city. while signatures are collected, the forest is being destroyed, the police are still killing. we cannot wait. if the referendum fails, actions like ours, and bolder, will be the only means available.

to these ends, we announce the march 5 movement (m5m). we are inspired by the brave actions of forest defenders on march 5, and reflect on the shortcomings of the march 5 action. we see that mass daylight actions are not possible for now, but the struggle must advance and escalate.

we encourage anyone who agrees to pick up these methods and claim actions in the name of m5m if they seek to disrupt the logistics of those who destroy the earth and dignified life on it.

we have shed enough tears and acted soley in revenge for too long. we encourage a revolutionary guerilla movement as a path forward.

5 people drove to the location and entered the property from the Constitution side gate. The gate did have one side open at the time. The 5 ran approximately 200 yards to an excavator being driven by a worker. Told him to leave. The group then chained themselves to the machine until the police arrived with bolt cutters. 20 to 25 protestors stood outside and protested.

All 5 were arrested and released on a signature bond. Stipulations to not return to the property.
